GOOD NEWS FOR DYNAMAX OWNERS : THE RFT ADAPTER

Transform your f/10 DYNAMAX 8 or 6 into an f/5 (Richest Field tele-
scope) with this amazing new accessory. Through the RFT Adapter,
Galaxies, Nebulae, and Star Clusters appear 4 times as bright!
Additionally, the RFT Adapter doubles the field of view of any
Criterion eyepiece.

The RFT Adapter is a new version of our popular photographic Focal
Reducer presently being used by DYNAMAX owners to reduce exposure
times in deep sky photography. A special system of adapters now
enables you to use the focal reducer visually with any of your
present eyepieces.

The RFT Adapter consists of several specially made parts that have
been precision machined to critical dimensions. In the drawing below:

"A" is a special "T"-thread adapter and slip-ring which attaches to
the rear threads of your Dynamax. By loosening the slip-ring, you
can rotate the entire RFT adapter assembly into convenient observing
positions. (Note: this "T" adapter is not the same as our Cassegrain
focus adapter you might already own.)

"B" is the focal reducer lens itself which threads onto the "T"-threads
of "A", and "C" is a custom star diagonal which accommodates the "T"
threads of the focal reducer lens.

NOTE: The focal reducer supplied with the RFT adapter can be used
visually or photographically and is the same lens that is sold
separately for photographic use. Consequently, if you have previously
bought our focal reducer, you may use it in conjunction with "A" and "C".

You may use any 1½" eyepiece in conjunction with the RFT adapter with
no vignetting, but we highly recommend our Criterion 32MM Plossl or
our fantastic Criterion 16.3 wide angle Erfle (75 degree apparent
field!). These two eyepieces provide the most sensational views when
used with the RFT Adapter.

Also, the RFT adapter when used in combination with our new Nebulae
Filter, provides stunning views of deep sky objects even under adverse
lighting conditions.

Complete RFT Adapter..\$74.95
RFT Adapter less lens.\$40.00
32mmPlossl eyepiece...\$35.00
16.3Erfle eyepiece....\$30.00
